TAKE YOUR PREFAB TO THE NEXT LEVEL

Turnover kills the profit within your Prefab shops.

Typical turnover rates in the electrical industry average over 55% annually. Unlike a typical jobsite, Prefab shops are forced to utilize much of their resources to re-train workers which stifle development of more advanced integrated prefab capabilities demanded in today's construction industry. This can create turnover rates in your prefab shops up to 200% per year. ***Don't fall into this trap of accepting marginal gains from your prefab shop!***

Avoid the Hidden Costs within your PreFab Shop.

Outsourcing the most common prefab tasks to allow your entire company devleop more integrated prefabrication approaches such as more advanced BIM integrated feeder and conduit systems, switchgear installations, multi-trade modular concepts, special systems, etc..

The costs for re-training new employees are ~18% of employee annual wages = $9,150 per employee.(1)

For a typical Prefab Shop, Outsourcing to Power PreFab *can save $91,500 per year.*

Avoided receiving, assembling, warehousing, and delivery costs *can save $48,000 per year.*(2)

Indirect Savings by outsourcing to Power PreFab can total $139,500 per year!
